Blueprint for Affective Computing

A sourcebook

Edited by

Klaus R. Scherer

Tanja Bänziger

Etienne B. Roesch

OXFORD
UNIVERSITY PRESS

Contents

Contributors xi

Section 1 **Theoretical approaches to the study of emotion in humans and machines**

- 1.1 Emotion and emotional competence: conceptual and theoretical issues for modelling agents 3
Klaus R. Scherer
- 1.2 Computational models of emotion 21
Stacy Marsella, Jonathan Gratch, and Paolo Petta

Section 2 **The emotion process: Perspectives from psychology and the neurosciences**

- 2.1 The component process model: Architecture for a comprehensive computational model of emergent emotion 47
Klaus R. Scherer
- 2.2 The emotional brain meets affective computing 71
Didier Grandjean and David Sander
- 2.3 The face and voice of emotions: The expression of emotions 85
Tanja Bänziger, Stéphane With, and Susanne Kaiser
- 2.4 Psychophysiological response patterning in emotion: Implications for affective computing 105
Sylvia D. Kreibig, Gunnar Schaefer, and Tobias Brosch
- 2.5 Emotions in interpersonal interactions 131
Brian Parkinson

Section 3 **Emotional expression: Ground truth and agent evaluation**

- 3.1 The essential role of human databases for learning in and validation of affectively competent agents 151
Roddy Cowie, Ellen Douglas-Cowie, Jean-Claude Martin, and Laurence Devillers
- 3.2 On the use of actor portrayals in research on emotional expression 166
Klaus R. Scherer and Tanja Bänziger

Section 4 **Approaches to the computational modelling of emotion**

- 4.1 WASABI as a case study of how misattribution of emotion can be modelled computationally 179
Christian Becker-Asano and Ipke Wachsmuth
- 4.2 Emotion in artificial neural networks 194
Etienne B. Roesch, Nienke Korsten, Nickolaos Fragopanagos, and John G. Taylor

Section 5 **Approaches to an implementation of affectively competent agents**

- 5.1 Expression of affects in embodied conversational agents 213
Sylvia Hyniewska, Radosław Niewiadomski, Maurizio Mancini, and Catherine Pelachaud
- 5.2 Synthesis of emotional speech 222
Marc Schröder, Felix Burkhardt, and Sacha Krstulović
- 5.3 Automatic detection of emotion from vocal expression 232
Laurence Devillers, Laurence Vidrascu, and Omar Layachi
- 5.4 Body gesture and facial expression analysis for automatic affect recognition 245
Ginevra Castellano, George Caridakis, Antonio Camurri, Kostas Karpouzis, Gualtiero Volpe, and Stefanos Kollias
- 5.5 Communicating emotional states with the Greta agent 256
Radosław Niewiadomski, Maurizio Mancini, Sylvia Hyniewska, and Catherine Pelachaud

Section 6 **Approaches to developing expression corpora and databases**

- 6.1 Introducing the Geneva multimodal emotion portrayal (GEMEP) corpus 271
Tanja Bänziger and Klaus R. Scherer
- 6.2 Induction techniques developed to illuminate relationships between signs of emotion and their context, physical and social 295
Roddy Cowie, Ellen Douglas-Cowie, Ian Sneddon, Margaret McRorie, Jennifer Hanratty, Edelle McMahon, and Gary McKeown

Section 7 **Conclusions**

- 7.1 Outlook: Integration and future perspectives for affective computing 311
Klaus R. Scherer, Tanja Bänziger, and Etienne B. Roesch

Bibliography 321

Appendix: A non-exhaustive list of online resources 369
